

## TRIBUCAN EDUCATION MANIFESTO

### WHAT CAN I DO?

**Be patient** since educating boys and girls is the lifetime task of the whole tribe.

**Support the family**, so that they do not feel lonely in their responsible task of educating their boys and girls in the search of happiness.

**Be respectful with the school and teachers**, because without education there is no future for boys and girls.

**Cooperate with the tribe** in the promotion of civic values like coexistence and respect from childhood.

**Show them models of life** which encourage boys and girls to persist and make their dreams come true.

**Promote the entrepreneurial spirit** through creativity, autonomy, self-discipline, persistence, self-confidence, a critical eye, teamwork, leadership and being organised...

**Educate in solidarity** because new generations are the base of a future fair world.

**Attend any call** from members of the educating tribe as a sign of responsibility.
