

TRIBUCAN EDUCATIONAL MANIFESTO

WHAT CAN I DO?

Be patient, because bringing up children is the lifetime duty of the whole tribe.

Support the family, so that it is never alone in the task of educating kids to be happy.

Respect the school and value the role of the teacher, because there is no future for children without education.

Collaborate with the tribe in the promotion of civic values like coexistence and respect from childhood.

Set life models which encourage children to be persistent in the pursuit of their dreams.

Promote entrepreneurial values like creativity, autonomy, self-discipline, persistence, self-confidence, critical attitude, teamwork, leadership and managerial capacity...

Educate in solidarity, as it is up to the new generations to build a fair and supportive world.

Help any member of the educative community who needs help, taking an active part, because I am responsible too.
